Objective of the Program:

The primary objective of the event was to enlighten the 5th-semester students of the Information Science and Engineering Department on the critical aspects of securing identity within a system. The expert talk aimed to provide insights into contemporary

Event Name	Expert talk on "Securing "The Identity" as a system
Theme	Awareness on System Security
Date	21st December 2023
Venue	Seminar Hall I Floor

Identity Access Management strategies.

Guest Speaker:
Pons Mudivai Arun
Product Leader - Identity Access Management
JumpCloud

Key Highlights:

Introduction to Identity Access Management (IAM):
Mr. Arun initiated the talk by providing a comprehensive introduction to Identity Access Management, elucidating its significance in the realm of cybersecurity.

Challenges in Securing Identity:
The speaker delved into the challenges associated with securing identity within a system, discussing emerging threats and vulnerabilities.

Best Practices in IAM:
Practical insights and best practices were shared, offering students valuable knowledge on implementing effective IAM solutions.

Real-world Case Studies:
Mr. Arun enriched the session with real-world case studies, illustrating how Identity Access Management is applied in diverse organizational settings.

Interactive Q&A Session:
The audience actively participated in a dynamic question and answer session, allowing students to seek clarifications and engage.
