

Resonance 23

Resonance 23, the first techno Enterprenueral fest of RVITM, was conducted on the 13th and 14th of December 2023 and found itself being the biggest technical fest of the college. With participation ranging over 30 colleges and 500+ students, Resonance provided the window for students to showcase their technical prowess and their entrepreneurial skills on the forefront. A collaboration of the major clubs of RVITM, it sparked the essence of team spirit and hard work as days of efforts reflected brightly during the DJ night on 14th after the highly successful overnight event on 13th. With this glory in the minds and hearts of all, we strive forward to bring out more and more from our students
